Tokai Rubber Industries, Ltd. (Head Office: Komaki City, Aichi Prefecture, President: Yoshiaki Nishimura) announces that it has held on location a 10th anniversary commemorative ceremony of the establishment of TOKAI RUBBER (JIAXING) Co., Ltd. (abbreviation: TRJ) - its automotive anti-vibration rubber manufacture & sales company in China’s Jiaxing City, Zhejiang Province.

In order to meet the growing automotive market due to the economic growth, we established TRJ in September 2003 as the group's fourth base in China, and it started production in 2005. The group positioned TRJ in the central region of China as a supply base for the factories of the Japanese OEMs, and currently has an established 3-pronged anti-vibration rubber supply system in conjunction with Tianjin (Northern China), and Guangzhou (Southern China).

More than 1,000 people were present at the ceremony, including government officials and group employees. Group President Mr. Nishimura pledged both his gratitude for the 10 years, and a further leap into the future by saying "With the support of local government and the effort of our employees, we have grown TRJ into a major production base in China for the group. Taking this 10 year anniversary as an opportunity, I expect TRJ to become a presence that leads China's TRI Group." In addition, TRJ employees boosted the venue by showing their songs and dances.

Since our group set up TOKAI RUBBER (TIANJIN) CO., Ltd. which became our first base in China in 1995, we have expanded our production and development base to a present total of 16 locations, including TRJ. We will continue to strengthen our management foundation towards making further market share gains in China, which is one of the world's hugest markets, in the future.
